monoxide and low molecular weight by hydrocarbons**.

Section 6 – Reactivity Data

Stability:	Stable
Hazardous Polymerization:	Will not occur.
Conditions/Materials to avoid:	None known
Hazardous Decomposition Products:	None generated under normal storage or handling conditions

Section 7 – Health Hazard Data

Potential routes of entry:	Inhalation, skin contact.
Effects of overexposure:	Direct skin contact with fibrous glass or its dust may cause mechanical irritation and transitory dermatitis. Breathing of fibers or dust may cause mechanical irritation of the mouth, nose, and throat.

EMERGENCY AND FIRST AID PROCEDURE:

Inhalation:	Move to fresh air area.
Ingestion:	Not likely to occur through normal use. Should ingestion occur, seek medical attention.
Eyes:	Flush with flowing water for 15 minutes – seek medical attention.
Skin:	Flush with ample cool water followed by washing with mild soap to remove accumulated fibers.
CARCINOGEN:	Not classified as regulated under ACGIH, IARC, NTP, or OSHA. Industry studies have shown textile grade fibrous glass to be a non-carcinogen.

Section 8 – Special Protection Required

Exposure to fibrous glass may cause mechanical irritation to the skin, eyes, nose and throat. Typically such irritation occurs to newly exposed individuals, and usually diminishes after several days of exposure.

Respiratory:	If airborne fibrous glass exceeds the regulatory limits, or if upper respiratory irritation occurs, use a respirator designed for nuisance type dust.
Ventilation:	Normal area ventilation is sufficient in most cases to keep dust and fiber levels below the TLV or PEL.
Skin:	Barrier creams, gloves, and long sleeve loose fitting clothing may be required for certain workers who have sensitive skin or contact dermatitis. Work clothing should be laundered separately from other clothing before reuse.
Eye:	Not normally required, but as a good safety work practice, suggest the wearing of appropriate eye protection such as safety glasses/side shields or equivalent whenever use of the product releases airborne fibrous glass.
Other:	Observe good personal hygiene.

Section 9 – Containment and Disposal

Containment & Clean Up:	Dust or loose fibers can be vacuumed or swept with the aid of a dust suppressant.
Disposal:	Dispose according to local, state, and federal laws. This material is not regulated under FCRA hazardous waste regulations.
