ANNULAR RING ANCHOR-BOLT

The Annular Ring Anchor Bolt, or Insulation Hanger, is a fabricated 2" X 2" perforated metal base, with a 3/16" annular ring pin attached for impaling and installing various thermal and acoustical insulation materials, quite often in marine applications. Popular materials are Mild Steel, Aluminum and Stainless Steel, with combinations of these materials also occurring for special applications. The typical annular insulation pin length is made in 7/8" increments and is used in conjunction with Self Locking Insulation Washers, or Speed Clips sized to fit the annular ring pin and general purpose adhesive, like Midwest Fasteners IHA-177.

SIZE :	D	3/16 nominal.Actual ring dia meter is .175".
LENGTH :	L	7/8, 1-7/8,2-7/8,and 3-7/8 are standard. Other lengths available by special order.

PLATE	BOLT
MATERIAL : LOW CARBON STEEL	LOW CARBON STEEL
PLATING : Galvanized is standard.	Copper plating is standard.
OTHER MATERIALS : Available by special order only.	
RETAINING CAP : The cap for use with this anchor-bolt is the MCAL part no. MCAL-625-875
