MISCELLANEOUS INSULATION WASHERS

The "capped speed washer", or dome cap, provided by MIDWEST Fasteners is a two element self-locking washer. This type of insulation washer consists of a spring clip retaining washer covered by an outer "cap". This type insulation cap is has become popular in insulation applications where cosmetics and/or personnel protection have importance. Available to mate and hold on various weld pins and insulation anchors, the capped washer is usually made in 14 gauge, 12gauge and 10 gauge hole sizes. Finishes often match insulation materials in use, with bright aluminum popular; but various color choices also are presented with white finish in stock, and other colors available.
